

Increase Effective April 12, 2021 for Various Products

Global supply constraints, and strong demand, continue to drive resin increases across several of our product portfolios. While we continue to focus on minimizing the impact, the cost increases in raw materials have necessitated a price adjustment, effective April 12, 2021.

Please see the average List Price percentage increases for various Products listed below:

5%	-	Piping Accessories (Rings, supports, gaskets, etc)
5%	-	Manual & Actuated Valves
5%	-	Metric PVC Pipe & Fittings
5%	-	Eco-FIT® Metric HDPE Pipe

Existing orders, as well as orders placed at standard pricing and for immediate shipment prior to April 12, 2021, will be priced without the increase. All project priced orders will be evaluated on an individual basis. We will have the updated list pricing, available online approximately one week prior to the effective date.

Though these are challenging times, we remain committed to our relationship and continuing to provide industry leading solutions.

Please contact your GF Representative with any questions or concerns.

Sincerely,

Kevin Shishido
Product Manager, Containment, Waste, Vinyls
