Price Increase Effective April 5, 2021 for Vinyls Pipe

Global supply constraints, and strong demand, continue to drive resin increases across the vinyl product portfolios. While we continue to focus on minimizing the impact, the cost increases in raw materials have necessitated a price adjustment, effective April 5, 2021.

Please see the average List Price percentage increases for various Products listed below:

| | | |
|-----|---|---------------------------------------|
| 8% | - | PVC SCH 80 Pipe |
| 8% | - | ChlorFIT CPVC SCH 40/80 Pipe |
| 8% | - | Shapes |
| 8% | - | PVC/CPVC Duct |
| 8% | - | Clear SCH 40/80 EnviroKing Clear Pipe |
| 8% | - | Custom Pipe |
| 15% | - | PVC SCH 40 and all SDRs Pipe |

Existing orders, as well as orders placed at standard pricing and for immediate shipment prior to April 5, 2021, will be priced without the increase. All project priced orders will be evaluated on an individual basis. We will have the updated list pricing, available online April 2nd.

Though these are challenging times, we remain committed to our relationship and continuing to provide industry leading solutions.

Please contact your GF Representative with any questions or concerns.

Sincerely,

Kevin Shishido
Product Manager, Containment, Waste, Vinyls
