

April 16, 2021

Dear Valued LASCO Customers,

In our effort to be fully transparent with our customers, LASCO is announcing a list price pressure increase effective May 3, 2021. The market forces between supply and demand of the PVC resin manufacturers continues, and LASCO has received yet another increase from our raw material supplier.

All LASCO pressure fittings categories will have a 7% list price increase over the April 2021 price lists. To arrive at the new price lists, divide the April list prices by .93. LASCO will also implement a 10% list price increase on Colonial Valves. Please divide the March list prices by .90 to arrive at the new list prices. The new list prices will be available in Excel format on our website at www.lascofittings.com by April 20th. Current invoice multipliers will remain in effect. DWV fittings will not increase at this time.

Orders received prior to 6pm CST on Friday, April 30 will receive current list prices on Pressure fittings and Colonial valves. All orders meeting allocation parameters are for immediate shipment and any unusually large orders may either be altered or denied.

We, at LASCO, thank you for your continued support and please know your business is greatly appreciated.

Sincerely,

LASCO Fittings, Inc.
